reduce
exposure to identity
theft & fraud.
Courtesey Verification Program...Free to Jurisdictions
Courtesy Verification Program
Fraudulent Document Recognition (FDR) Training

• Recognize possible fraud
• Protect the integrity of documents
• Conduct cost-effective training
• Comply with Federal requirements
2012 FDR Update
CDL Examiner Training

• FREE for jurisdiction members

• Hands-on refresher training for lead examiners, or trainers who can return to their jurisdiction to conduct examiner and refresher training as needed.

• Training sessions focus on the use of the Certified Commercial Examiner Instructor Manual developed by the AAMVA International Driver Licensing Examiner Certification Executive Board.
International Driver Examiner Certification (IDEC) Program

- Certified Driver Examiner (CDE),
- Certified Motorcycle Examiner (CME)
- Certified Commercial Examiner (CCE)

Requirements for the IDEC Certification:
- Training—applicants must satisfactorily complete the approved examiner training course.
- Service—a minimum one year of satisfactory, on-the-job performance as a examiner.
- Examination—each applicant must attain a passing score of 80% or better on the examination.
- Application—after passing the examination, applicant must complete an application form.
- Awards—approved applicants are issued a certificate and wallet-sized ID card. Annually, the IDEC Board recognizes and awards outstanding examiners through the Examiner of the Year Hall of Fame.

AAMVA does not certify testers directly. AAMVA provides the certification avenue for jurisdictions to certify their jurisdictional and third-party testers.

Commercial Driver's License Information System (CDLIS)

The Commercial Driver's License Information System (CDLIS) is the nationwide computer system that enables State Driver Licensing Agencies (SDLAs) to ensure that each commercial driver has only one driver's license and that the State of Record (SOR) has the driver's complete driver record. State driver licensing agencies use CDLIS to complete various procedures, including transmitting out-of-state convictions and withdrawals, transferring the driver record when a CDL holder moves to another state, and responding to requests for driver status and history.
Technology Services

Providing application solutions and networking services.

Application Services

AAMVA developed and maintains a number of information systems facilitating the electronic exchange of information between jurisdictions.

Featured services include:
- Commercial Driver's License Information System (CDLIS)
- National Motor Vehicle Information System (NMVIS)
- Commercial Skills Test Information Management Systems (CSTIMS)

Driving Toward Zero Deaths: A National Strategy on Highway Safety

With over 35,000 fatalities occurring on the Nation's highways each year, roadway safety remains one of the most challenging issues facing America. Although many highway safety stakeholders continue to have...
Key among AAMVA’s goals is improving highway safety and identification security by promoting uniform standards for all areas related to driver licensing. AAMVA is committed to improving driver safety and to the “one driver, one record” driver’s license concept.
