

Virginia Update

Dave Burhop
Deputy Commissioner/CIO
March 14, 2012

What's Happening at Virginia's DMV?

- FACE Modernization Program
- Veterans ID
- Troops to Trucks
- 5 Mobile Units
- Hunting/Fishing Licenses; Boat Registrations
- E-Renewal Notices reach 1 million subscribers
- Compatibility for twenty-nine of our thirty-one web transactions on the Droid, iPad and iPhone
- E-ID/Commonwealth Authentication Services (CAS)

What is e-ID?

- Virtual high assurance credential indicating that you (probably) are who you say you are
- Provides a safe and secure means for public and private organizations to conduct electronic commerce
- Involves Identity Proifiers, Credential Issuers and Relying Parties
- Methodology/Technology that focuses on privacy
- Logical fit for AAMVA and jurisdictions
- Potential (significant) revenue stream

Commonwealth Authentication Services (CAS)

- A statewide approach for agencies to authenticate citizen access to government services using one source
- Reduces fraud and abuse in the delivery of healthcare services
- Conducting a pilot with Department of Social Services (DSS)
- DMV citizen records matched against DSS citizen records to create “Golden Record”
- CAS uses the attributes of the Golden Record to authenticate citizen identity

Commonwealth Authentication Services (CAS)

- CAS design nearly complete
- Data modeling complete
- Governance models being developed
- Data sharing issues identified and resolved
- Chargeback models being developed
- Enterprise Data Management (EDM) database being built
- Service Oriented Architecture (SOA) tools being installed
