

EMERGENCY CONTACT DATABASE

Jesse White

IL Secretary of State

Emergency Contact Database

- Established July 1, 2009 (SB 993 PA 95-0898)
- Connected to LEADS (Law Enforcement Agencies Data System)
- Allows law enforcement to look up emergency contact information to quickly notify family members about emergency situation.
- Only Illinois DL and ID card holders can register.

Emergency Contact Database

- Illinois uses online registration only by the DL or ID Card holder. (no mail-in or facility intake)
- Modified in 2010 to allow registrations to also put in special medical condition, disability or special need.
- For security, individuals must use their DL/ID number, date of birth and last digits of SSN to register contact information.

Emergency Contact Database

- ECD allows individuals to register contact information for two individuals. Contacts do not have to live in Illinois.
- ECD allows individuals to modify or delete their information at any time.

Emergency Contact Database

- Working with groups to target those individuals who travel as part of their employment or hobbies (i.e., trucking industry and ABATE) and
- Targeting Illinois' largest employers (i.e., government, Boeing, State Farm Insurance, John Deere, Caterpillar).
- Working with the healthcare and insurance industry to target patients and clients

Emergency Contact Database

- Also targeting our most vulnerable citizens— senior citizens through IL Department on Aging and AARP) and teenage drivers (through IL GDL program).

Emergency Contact Database

- Law enforcement has been extremely helpful by passing out information at traffic stops, community events and during roadside safety stops.
