# 1 GENERAL INFORMATION

---

## 1.1 BACKGROUND

The American Association of Motor Vehicle Administrators (AAMVA) is a nonprofit organization representing officials in all 69 states, provinces and territories engaged in the administration and enforcement of driver and motor vehicle laws in the United States and Canada. Through its membership, the association develops model programs and serves as an information clearinghouse and international spokesperson for members' interests. Our vision: Safe Drivers, Safe Vehicles, Secure Identities, Saving Lives.

The Association's mission is to support North American motor vehicle and law enforcement agencies. A proponent of jurisdictional rights and the unique circumstances that dictate each jurisdiction's legal and regulatory environment, AAMVA provides a host of solutions and services for jurisdictional representatives tasked with administering and enforcing motor vehicle laws. These solutions and services, such as business process best practices, educational and training events, and technology platforms are developed under the direction of the membership

## 1.2 PRODUCT DESCRIPTION

AAMVA offers several types of services.

### 1.2.1 AAMVA Data Exchange Application

AAMVA develops and maintains many information systems that facilitate the electronic exchange of driver, vehicle, and identity information between organizations.

### 1.2.2 Software for AAMVA Data Exchange Applications

Software for use with AAMVA various data exchange applications for translating messages and communicating via the AAMVAnet™ network.

### 1.2.3 Verizon Business Managed Services

Secure network services including connectivity to the Verizon Business Private IP (PIP) network, backup and redundancy for network connectivity, managed firewall services, and more.

### 1.2.4 Open Text Interchange Services for e-business

Electronic Data Interchange (EDI) and messaging tools offered by Open Text.

### 1.2.5 Additional AAMVA Services

AAMVA tailored applications for use by AAMVA members and in conjunction with AAMVA Data Exchange Applications.

### 1.3 ABOUT THE RATE SCHEDULE

All rates are effective through September 30th, 2023, and are subject to change thereafter with 30-days prior written notice.

All fees, are exclusive of any applicable state or local sales, use or other taxes of a similar nature. Unless it furnishes a current, valid sales and use tax exemption certificate, customer shall be responsible for all such taxes imposed upon AAMVA for amounts paid by customer to AAMVA under any services Agreement.

### 1.4 ADDITIONAL INFORMATION

Contact AAMVA Customer Service: [CustomerService@aamva.org](mailto:CustomerService@aamva.org).

## 2 AAMVA GENERAL SERVICES

### 2.1 ADMINISTRATIVE SERVICES

- An enrollment charge occurs when a new Master Account or Sub-Account is established for a subscriber
- A subscriber can request multiple Sub Accounts within a Master Account
- The billing information supplied to the subscriber will be by Sub-Account
- Only the Master Account will be charged the monthly service fee

#### 2.1.1 Administrative Fees

Item Description	BEID	Unit	Rate
Enrollment Chrg all Master & Subaccounts	MVA-ENROLM	per invoiced account one time	\$180.00
Service Fee - Master Account only	MVA-SVCFEE	per month	\$40.00
Billing Extract	MVA-BILDET	per request	\$200.00
Detail Billing- Paper	MVA-DTLPPR	per month	\$25.00
Detail Billing- Electronic*	MVA-DTLELC	per month	\$25.00

\*If IE is selected for delivery, IE fees also apply.

If e-mail is selected for delivery, there is no charge for electronic billing.

### 2.2 SECURITY DEPOSIT

Per contract/agreement AAMVA will require a security deposit from the Participant for certain applications. This fee varies based on the contract.

Item Description	BEID	Unit	Rate
Security Deposit	MVA-SECDEP	per invoiced account-one time	Per Quote

The deposit shall be returned to Participant based on agreement/contract signed.

### 3 AAMVA DATA EXCHANGE APPLICATIONS

#### 3.1 DRIVER SERVICES

##### 3.1.1 Commercial Driver License Information System (CDLIS)

The Commercial Driver's License Information System (CDLIS) is a nationwide computer system that enables state driver licensing agencies (SDLAs) to ensure that each commercial driver has only one driver's license and one complete driver record.

CDLIS was established under the Commercial Motor Vehicle Safety Act (CMVSA) of 1986 and is based on the Federal Motor Carrier Safety Regulations (FMCSRs) in 49 CFR 383 and 384.

For More information go to <https://www.aamva.org/technology/systems/driver-licensing-systems/cdlis>

##### 3.1.1.1 CDLIS Third Party Access for CDLIS Employers Verification

AAMVA will grant limited CDLIS access to employers and prospective employers via a third-party inquiry transaction, by which they can obtain basic driver identification data directly from the CDLIS Central Site. The transaction is governed by the following fees:

##### 3.1.1.2 CDLIS Fees

CDLIS fees cover the monthly cost of operating the CDLIS system. The fee can be waived for drivers having moved from their CDL jurisdiction of record to another jurisdiction and have, as part of their driver license application in the new jurisdiction, dropped their CDL privilege. To have the fee waived for these drivers, each jurisdiction must track and report the number of drivers in this category and email them to [Billing@AAMVA.org](mailto:Billing@AAMVA.org) by the 10<sup>th</sup> of each month.

Item Description	BEID	Unit	Rate
CDLIS 3 <sup>rd</sup> Party Set Up Fee (AMIE)	CDL-CDLISSETUP	One time	\$12,000
CDLIS 3 <sup>rd</sup> Party Set Up Fee (Web Services)	CDL-CDLISWEB	One time	\$12,000
0 to 2,000 Transactions	CDL-SI	Flat Fee	\$2,500.00
Transaction Fees	CDL-SI	2001 – 5,000 transactions per month	.93 per transaction
Transaction Fees	CDL-SI	5,001 – 20,000 transactions per month	.63 per transaction
Transaction Fees	CDL-SI	20,001 – 300,000 transactions per month	.33 per transaction
Transaction Fees	CDL-SI	300,001 and above per month	.20 per transaction

##### 3.1.2 SR 22/26

AAMVA's electronic SR 22/26 application automates SR22 and SR26 filings. An insurance company transmits SR22 and SR26 batch records to a jurisdiction, usually in the evening, and the jurisdiction responds as soon as the next morning as to whether the filing status is accepted or rejected.

### 3.1.2.1 About SR22 and SR26 Forms

Certain high risk or problem drivers who are convicted of serious moving violations are required by state financial responsibility (FR) laws to file an SR22 form (a certification of future proof of financial responsibility) with their state motor vehicle department to prove they have insurance. Failure to provide such proof results in license suspension. Drivers must ask their insurer to file the SR22 form with a state by a certain date. When done manually, this process can take days and may result in the driver's license being suspended if the SR22 form is filled out incorrectly or filed late.

After future proof is no longer required for a driver, a SR26 form is sent to cancel the SR22. Although variations exist among states, the Uniform Vehicle Code (from which all state FR laws are derived) requires that a jurisdiction be notified at least 10 days prior to the termination of an SR22 filing.

For More information go to <https://www.aamva.org/technology/systems/driver-licensing-systems/sr22-26>

### 3.1.2.2 SR22/26 Fees

Item Description	BEID	Unit	Rate
Business Partner:			
SR22/26 Stds Development Service	MVA-SR2226	per month, per application	\$201.66

## 3.2 VERIFICATION SERVICES

### 3.2.1 Driver's License Data Verification (DLDV) Service

Driver Licenses, Driving Permits and Identification Cards (collectively, "DL/ID") issued by U.S. Jurisdictions are regularly used as proof of identity; however, a card may be counterfeit or altered. The purpose of AAMVA's Driver License Data Verification (DLDV) service is to provide commercial and government entities with the real-time capability to verify DL/ID information against data from the issuing agency.

#### 3.2.1.1 Benefit for DLDV Users

The DLDV Service provides users with immediate verification of identification document data. DLDV users submit data on a DL/ID and the service returns a flag for each data element that indicates if the element matches the data on file with the issuing jurisdiction. Users interact with the service via a web-service call.

#### 3.2.1.2 Benefits for Jurisdictions that Issue the Cards

The DLDV Service offers these benefits for participating jurisdictions:

- Participation in the fight against the fraudulent use of driver's license.
- Fee-based revenues, which AAMVA shares with the jurisdictions.
- Protects personally identifiable information by not releasing any of the jurisdiction's data.
- Protects the integrity of the credential issued by the jurisdiction.

For More information go to <https://www.aamva.org/technology/systems/verification-systems/dldv>

### 3.3 VEHICLE SERVICES

#### 3.3.1 Electronic Lien and Title (ELT)

The Electronic Lien and Title (ELT) System gives you the capability to electronically exchange lien and title information between a lienholder and a jurisdiction's motor vehicle agency.

##### 3.3.1.1 Benefits

###### *Jurisdiction Benefits*

- Potential staff reduction in areas associated with filing, retrieval and mailing of paper titles
- Reduction of storage space needed for filing and storing paper titles
- Ease of processing for dealer transactions

###### *Lienholder Benefits*

- Potential staff reduction in areas associated with filing, retrieval and mailing of paper titles
- Reduction of storage space needed for filing and storing paper titles
- Ease of processing for dealer transactions

###### *Information That Can Be Exchanged*

ELT includes transactions that allow the jurisdiction to send electronic messages to the lienholder.

For example, a jurisdiction can use the **Lien Notification** transaction to notify the lienholder that the lien has been recorded on the jurisdiction's title record.

ELT also includes transactions that allow the lienholder to send electronic messages to the jurisdiction. For example, a lienholder can use the **Lien Release** transaction to notify the jurisdiction when a lien is paid off. Once processed, the jurisdiction creates and mails a paper title to the owner. In another example, a lienholder can use the **Request for Paper Title** to obtain a paper copy of the title, but not release interest in the vehicle.

For More information contact [CustomerService@aamva.org](mailto:CustomerService@aamva.org)

##### 3.3.1.2 ELT Fees

Item Description	BEID	Unit	Rate
Business Partner:			
ELT Standards Development Service	MVA-ELT	per month	\$201.66
ELT Batch/LL Mainframe	MVA-ELTBMM	Per month	\$201.66

#### 3.3.2 Business Partner Electronic Vehicle Registration (BPEVR)

Business Partner Electronic Vehicle Registration (BPEVR) allows jurisdictions' business partners to apply for registrations and titles electronically. A business partner is any entity that does business with a jurisdiction. For the BPEVR application, dealerships, fleet operators, and any other entity that submits applications for registration or title to the jurisdiction may be partners.

Using BPEVR, an authorized business partner sends the registration application to the jurisdiction. The jurisdiction then sends back the fee information and permission for the business partner to print the registration card and put the registration plates and stickers on the vehicle.

This allows the business partner to register the vehicle and put it on the road with valid registration information within the same day--no more temporary plates! At the end of the business day, the jurisdiction sends the business partner a summary of transactions and a notification of fees due. The business partner then arranges to transfer funds overnight for the day's business. (Electronic funds transfer is not part of the BPEVR application).

**3.3.2.1 Benefits**

- Improved customer service and decreased lines in the motor vehicle branches
- Cost savings
- Enhanced data integrity
- Reduction in the turnaround time for processing applications for registration and titles

Available Information to be exchanged in BPEVR includes transactions that allow the business partner to send the following electronic messages to the jurisdiction:

- Fee Inquiry
- Application for Registration and Title
- Add Owner
- Change Owner Address
- Inventory Ordering
- Vehicle Inquiry

The jurisdiction can send the following electronic messages to the business partner:

- Electronic Billing
- Administrative Messages

Business partners may choose to contract with a service provider for some or all of the BPEVR functions.

For More information contact [CustomerService@aamva.org](mailto:CustomerService@aamva.org)

**3.3.2.2 BPEVR Fees**

Item Description	BEID	Unit	Rate
Business Partner:			
BPEVR Stds Development Service	BPV-BPEVR	per month per application	\$201.66
BPEVR Usage Based Transaction Fees	BPV-BR	Per transaction	\$0.004

**3.3.3 National Motor Vehicle Title Information System (NMVTIS)**

The National Motor Vehicle Title Information System (NMVTIS) is a system that allows the titling agency to instantly and reliably verify the information on the paper title with the electronic data from the state that issued the title. NMVTIS is designed to protect consumers from fraud and unsafe vehicles and to keep

stolen vehicles from being resold. NMVTIS is also a tool that assists states and law enforcement in deterring and preventing title fraud and other crimes. Consumers can use NMVTIS to access important vehicle history information.

### 3.3.3.1 Purpose

NMVTIS was created to:

- Prevent the introduction or reintroduction of stolen motor vehicles into interstate commerce
- Protect states and consumers (individual and commercial) from fraud
- Reduce the use of stolen vehicles for illicit purposes including funding of criminal enterprises
- Provide consumers protection from unsafe vehicles

For More information go to <https://www.aamva.org/technology/systems/vehicle-systems/nmvtis>

### 3.3.3.2 NMVTIS Consumer Access Fees

The Anti-Car Theft Act of 1992 (Act) was enacted to deter trafficking in stolen vehicles by strengthening law enforcement against auto theft (Title I), combating automobile title fraud (Title II), preventing "chop shop" related thefts (Title III), and inspecting exports for stolen vehicles (Title IV).

Title II of the Act requires the U.S. Department of Transportation (DOT) to implement a National Motor Vehicle Title Information System (NMVTIS). The Act specifies that the information within NMVTIS shall be available to participating jurisdictions; federal, state and local law enforcement officials; insurance carriers; and other prospective purchasers (e.g., individuals, auction companies, and used car dealers).

### 3.3.3.3 NMVTIS Consumer Access Service Fee Schedule

- **AAMVAnet™ Connectivity:** To be quoted in separate Customer Confirmation Document (CCD) once an appropriate configuration is designed to support customer requirements and AAMVA application use.
- **Application Fee:** A one-time, non-refundable application fee of \$1,000 (NMC-APP FEE) shall be payable to AAMVA. This fee may have applicable taxes associated with them. If so, these taxes would be billed to you in the following month's invoice.
- **Setup Fees:** A one-time, non-refundable setup fee of \$30,000 (NMC-NMVTSET1) shall be payable to AAMVA upon execution and delivery of this Agreement by Data Provider.
- **Deposit:** Lack of financial documentation or length of credit history including a start-up company may require an additional deposit at contract execution.

### 3.3.3.4 Transaction Fees

#### *Boolean (True/False) Inquiries (effective July 1, 2021)*

An Approved NMVTIS Data Provider can utilize a feature to conduct an inquiry into NMVTIS to determine if a record exist in NMVTIS. The NMVTIS response will not provide any data, it would only response with a "true" or "false".

The fee for use of the feature is \$0.015 per inquiry regardless of the response provided

Item Description	BEID	Unit	Rate
Boolean	NMC-BB	Per inquiry	\$0.015

**Data Inquiries**

There is a minimum monthly billing amount. Approved NMVTIS Data Provider will be billed either the total billable transactions multiplied by the applicable rate or \$7,500, whichever is greater. The rates below are charged per VIN searched, where either a current title record or a brand record or JSI record was found; no fee will be charged with respect to a VIN searched if a record is not on NMVTIS.

Item Description	BEID	Unit	Rate (cost per hit*) (effective 10/1/22)
Transaction Fee	0 to 7,000 hits per month	NMC-BI	\$1.593
Transaction Fee	7,001 – 14,000 hits per month	NMC-BI	\$1.274
Transaction Fee	14,001 – 21,000 hits per month	NMC-BI	\$0.956
Transaction Fee	21,001 – 30,000 hits per month	NMC-BI	\$0.637
Transaction Fee	30,001 – 50,000 hits per month	NMC-BI	\$0.446
Transaction Fee	50,001 – 100,000 hits per month	NMC-BI	\$0.382
Transaction Fee	100,001– 200,000 hits per month	NMC-BI	\$0.255
Transaction Fee	200,001– 400,000 hits per month	NMC-BI	\$0.234
Transaction Fee	400,001 – 600,000 hits per month	NMC-BI	\$0.212
Transaction Fee	600,001 plus hits per month	NMC-BI	\$0.191

\* A “hit” is defined as when the inquiry results in a record being found on NMVTIS.

## 4 INTERFACE SOFTWARE

### 4.1 UNIFIED NETWORK INTERFACE (UNI)

UNI handles message exchanges between two or more AAMVAnet™ sites. It uses the network and data standard AMIE, AAMVAnet Message Interchange Envelope.

UNI was developed by the member agencies of the American Association of Motor Vehicle Administrators (AAMVA). These agencies paid for the development of the software through user fees and are granted use of this software for the payment of maintenance charges only.

Two main versions of UNI are available: The UNI Mainframe (legacy version) and the Windows version.

The UNI Mainframe supports the following platforms:

- IBM z/OS/CICS/VSAM
- IBM IMS/DL1 (Existing Customers Only)
- UNISYS 1100-2200/DMS (Existing Customers Only)
- UNIX (Existing Customers Only).

**Note:** The UNI mainframe version will not be supported after January 2025.

The UNI Windows versions supports all versions of Microsoft Windows from Windows 2008 and above.

#### 4.1.1 UNI Fees

Item Description	BEID	Unit	FY 2023
UNI Mainframe Maintenance	MVA-UNI2	per month	\$1,036.20
UNI Windows Maintenance	MVA-UNIWIN2	per month	\$725.34
UNI Lease Online Only Windows **	MVA-UNIWINOLL2	per month	\$264.88
UNI Mainframe Maintenance Additional License		per month	\$579.19
UNI Windows Maintenance Additional License	MVA-UNIWINL2P	Per month	\$450.48

**Notes:**

1. UNI charges apply only to Production environments and not to copies running in Development, Test or Disaster Recovery environments.
2. UNI charges apply to each platform type used. If a site has a IBM CICS and a Microsoft Windows copy, the site will be charged for a UNI Mainframe fee and a UNI Windows Maintenance fee.
3. “Additional License” fee applies to each additional copy running in production on the same platform type than the primary copy. For example, if a site has two Windows servers, each running UNI (e.g. one for NMVTIS and one for DIA), the site will be charged for one full fee and one “Additional License” fee.

## 5 NETWORK SERVICES

### 5.1 NETWORK CONNECTIVITY SERVICE

AAMVAnet™ infrastructure support costs are included in the leased line fees for all customers connected via AAMVAnet™ leased lines. For customers connecting to AAMVA infrastructure resources without an AAMVAnet™ leased line, support cost is covered through the Network Connectivity Service.

#### 5.1.1 Network Connectivity Service Fees

Item Description	BEID	Unit	Rate
NCS Usage Charge	MVA-NCS	Per Month Per Tunnel	\$400.00

### 5.2 VERIZON MANAGED IP SERVICES

#### 5.2.1 Verizon PIP MPLS Services

Verizon Private IP (PIP) is a secure, fully managed private network environment that utilizes a layer 3 MPLS core that provides an integrated, secure and scalable network infrastructure. The fully managed services include the telco circuit and a Customer Premise Equipment (CPE) package that includes a Cisco router, and a modem for out of band access by Verizon for remote access and management.

**Note:** The customer must provide and dedicate an analog voice grade line (i.e. POTS line) to attach to each modem for vendor access for installation and on-going support and maintenance.

In order to provide a heightened level of security, AAMVAnet™ has customized this environment to provide end to end encryption (AES-256) for all AAMVA applications (CDLIS, PDPS, NMVTIS, SSOLV/ HAVV, etc.) traversing the AAMVAnet™ network. Encryption can be implemented for other non-AAMVA application traffic upon customer request and upon trading partner concurrence for the same.

#### 5.2.2 Port/Circuit Pricing

AAMVA now offers fully managed Ethernet access/port services in addition to the legacy TDM fully managed services listed below. Ethernet's simplicity, scalability, and inter-operability provide tangible benefits and cost-savings over legacy TDM solutions. The prevalent use of Ethernet within most corporate Local Area Networks makes the extension of Ethernet access across the WAN a natural evolution given the low cost of Ethernet hardware. As Ethernet Access continues to gain popularity, service providers innovate new ways to reduce price and expand coverage. AAMVA through our service provider Verizon, now delivers Ethernet Access over technologies such as Ethernet over Hybrid Fiber Coax, and Ethernet over Fiber technologies to expand the availability of competitively priced Ethernet Access solutions.

Ethernet services are offered in a variety of configurations with port speeds ranging from 1M to 100M and are quoted on a per site basis.

Circuit Option	Monthly Recurring Fees
Ethernet port speeds range 1M to 100M	Per Quote

### 5.2.3 Secure Cloud Interconnect (SCI)

SCI provides secure, direct connectivity between select cloud provider networks and the AAMVAnet MPLS network.

As it is an MPLS network and cloud network edge solution, there is no access link to procure nor any additional equipment necessary in your cloud environment.

Please contact your AAMVA Network Account Manager for more information regarding the cloud providers and cities where SCI is available.

Description	BEID	Unit	Rate
SCI data usage	VZB-SCI000000P	Per Gigabyte	\$7.13

### 5.2.4 PIP Site - Single Circuit No Redundancy with a Single Managed Router

Pricing listed below includes all necessary components for customer access, with the exception of any Rack-Mount charges.

Circuit Option	BEID	Monthly Recurring Charge
Single Circuit 56/64 Kbps Single Router	VZB-00000030	\$1,018.34
Single Circuit 256 Kbps Single Router	VZB-00000047	\$1,735.26
Single Circuit 512 Kbps Single Router	VZB-00000034	\$2,018.99
Single Circuit T1 (1.54K) Single Router	VZB-00000050	\$2,682.12

**Note:** 128 Kbps no longer available.

### 5.2.5 PIP Site - Dual Circuits with a Single Managed Router

Pricing listed below includes all necessary components for customer access, with the exception of any Rack-Mount charges.

Circuit Option	BEID	Monthly Recurring Fees
Dual Circuit 56/64 Kbps Single Router	VZB-00000009	\$1,919.95
Dual Circuit 256 Kbps Single Router	VZB-00000064	\$3,353.02
Dual Circuit 512 Kbps Single Router		\$3,920.48
Dual Circuit T1 (1.54Kbps) Single Router	VZB-00000021	\$5,246.74

**Note:** 128 Kbps no longer available.

### 5.2.6 PIP Site - Dual Circuits with Dual Managed Routers

Pricing listed below includes all necessary components for customer access, with the exception of any Rack-Mount charges.

Circuit Option	BEID	Monthly Recurring Fees
Dual Circuit 56/64 Kbps Dual Router	VZB-00000049	\$2,036.68

Circuit Option	BEID	Monthly Recurring Fees
Dual Circuit 256 Kbps Dual Router	VZB-0000099	\$3,470.52
Dual Circuit 512 Kbps Dual Router	VZB-0000067	\$4,037.98
Dual Circuit T1 (1.54Kbps) Dual Router		\$5,364.24

**Note:** 128 Kbps no longer available.

**5.2.7 PIP Site - Backup Shadow Circuit**

This service only supports full T-1 and DS3 speeds. The pricing below reflects the additional cost to a customer’s current bandwidth. This solution provides a backup circuit that is only active when the primary circuit is down. Pricing below includes all components needed for AAMVAnet connectivity.

Circuit Option	BEID	Monthly Recurring Fees
Backup Shadow Circuit 26/64 Kbps	VZB-0000039	\$853.36
Backup Shadow Circuit 256 Kbps		\$1,411.26
Backup Shadow Circuit 512 Kbps	VZB-0000036	\$1,528.00
Backup Shadow Circuit T1(1.54K)	VZB-0000048	\$1,628.07

**Note:** 128 Kbps no longer available.

**5.2.8 PIP Site - Geographically separate site using a Backup Shadow circuit**

This service only supports full T-1 and DS3 speeds. The pricing below reflects the additional cost to a customer’s current bandwidth. This solution provides a backup circuit that is only active when the primary circuit is down.

**Note:** Rack mount fees not included.

Circuit Option	BEID	Monthly Recurring Fees
Geo. Separate D.R. 56/64 Kbps Circuit	VZB-0000038	\$1,009.06
Geo. Separate D.R 256 Kbps Circuit	VZB-00000070	\$1,318.75
Geo. Separate D.R 512 Kbps Circuit		\$1,347.53
Geo. Separate D.R T1 (1.54K) Pip Line Circuit		\$1,376.30

**Note:** 128 Kbps no longer available.

**5.2.9 PIP Site – Additional Fees**

Expedite / Rescheduling	BEID	Non-Recurring Fees
Expedite Fees – Request in writing for router activation & circuit installation		Per Quote
Rescheduling Fees – Rescheduling a router activation or circuit installation		Per Quote

Expedite / Rescheduling	BEID	Non-Recurring Fees
After Hours Fees		Per Quote
Rack-Mount Kit for Router Installation	VZB-00000005	\$65.00

Optional PIP Services	Non-Recurring Fees
Dynamic Host Configuration Protocol (“DHCP”) IP Helper – Add / Modify / Delete	\$53.00
IP Network Address Translation – Add / Modify / Delete	\$53.00
Network Routed Protocol – Add / Modify / Delete	\$53.00
New Verizon Service Operations (“MSO”) IP Address / Subnet Mask Changes	\$53.00
Permanent Virtual Circuit – Add / Modify / Delete	\$53.00
Routing Protocol – Add / Modify / Delete	\$53.00
VPN Tunnel – Add / Modify / Delete	\$53.00
Hardware Module Upgrades	\$368.00
Demand Dispatches – Outside Scope of Normal Work – 2-hour minimum charge	\$284.00
Bandwidth Increase / Decrease Physical	\$368.00
Traffic Filter Design	\$368.00
Traffic Shaping Queuing	\$368.00
Memory Upgrade	\$368.00
Device (Router, etc.) Operating System Change – Support new features	\$368.00

WAN (router, etc.) Inter-building or across town move	\$630.00

### 5.2.10 Verizon Site Services

Verizon Business is making network deployment as easy and as efficient as possible for our customers while saving time and providing value. Our suite of Site Services is designed to help companies quickly and efficiently prepare their networking environments for a broad range of VoIP, Internet, and data solutions. Whether customers are tasked with extending demarcation, conducting a LAN assessment in preparation for a new application/service, or preparing cable to accommodate new employees, Site Services offers a one-stop resource for network deployments from beginning to end. We provide technical service and support to enterprise customers of all sizes through our expanded Site Services portfolio, which includes:

### 5.2.11 Inside Wiring

Installation of wiring to connect two pieces of equipment (i.e., wiring runs from the switch in the server room to a desktop client).

**5.2.12 Extended Demarcation**

Installation of wiring that extends from the Verizon demarcation point to some point within the customers building that is closer to their equipment (e.g., to the server room where the router resides).

**5.2.13 Site Survey**

A survey of the proposed location for installing CPE and a report on that location's suitability for that purpose with respect to environmental conditions (e.g., temperature, humidity, obvious contaminants, or nearby magnetic radiation sources), the availability of an appropriate power source, and the need for any additional inside wiring.

Service Description	BEID	Rate
Inside Wiring - 1 service call, 2 hours on-site labor, up to 150 feet Cat 3 or Cat 5 cable, connectors, ty-wraps/straps, jack, face plate, cable test		\$505.00
Extended Demarc - 1 service call, 2 hours on-site labor, up to 150 feet Cat 3 or Cat 5 cable, connectors, ty-wraps/straps, jack, face plate, cable test	VZB-00000011	\$505.00
Physical Site Survey - 1 service call w/up to 2.5 hours of labor, and site survey report	VZB-00000015	\$455.00

**5.3 AT&T SNA SERVICES**

All customers requiring SNA services will need to order AT&T B2B services. Please contact your network account manager for more information.

**5.3.1 AT&T SNA Services Fees**

Description	Unit	BEID	Rate
Business 2 Business Installation Charge	One Time	MVA-00000025	\$3,000.00
Business 2 Business Fee	Per Month	MVA-00000024	\$1375.00

## 6 OPENTEXT INTERCHANGE SERVICES FOR E-BUSINESS

### 6.1 INFORMATION EXCHANGE (IE) SERVICES

Information Exchange is a mailbox service for e-business, and a common point of contact between you, your applications, and your trading partners. You can send and receive information of virtually any size in electronic form, from standard-format EDI transactions to free-format documents. Information Exchange receives transactions and documents from trading partners on a network, routes them to the recipients, and stores the data for retrieval.

Information Exchange Administration Services is a panel-driven interface that you can use to perform administrative tasks for the Information Exchange users you support. I.E. Administration Services provides the ability to administer Information Exchange through online, batch, or Internet interfaces. Service administrators can coordinate use of Information Exchange within their companies. For example, set up trading partners for communications with users in other companies. With Information Exchange Administration Services, you can:

- View and delete mail, hold and remove hold on messages
- View, delete, and retrieve archived mail
- Modify user and trading partner profiles
- Create and modify carbon copy relationships with trading partners
- Create and modify alias tables
- Create a library to store information for an extended time period
- Define and authorize access to Internet and X.400 trading partners
- Access audit and session information
- Change or reset Information Exchange passwords
- Reset user sessions

Information Exchange Administration Services for the Web provides Internet Protocol (IP) customers with the ability to access many Information Exchange Administration Services functions without using 3270 emulation.

#### 6.1.1 IE Standard Fees

Recommended for file sizes between the ranges of 8K to 500K.

Item Description	Unit	BEID	Rate
IE Messages - Prime	each message	IBM-00000019	.29
IE Messages – Non-Prime	Each message	IBM-00000020	.145
IE Characters - Prime	1,000 char.	IBM-00000025	.068
IE Characters – Non-Prime	1,000 char.	IBM-00000026	.034
Local Dial Access - Prime	1,000 char.	IBM-000000930	.026
Local Dial Access – Non-Prime	1,000 char.	IBM-000000931	.013

Item Description	Unit	BEID	Rate
800 # Dial Access surcharge	1,000 char.		.039
Legacy Gateway Dial Access surcharge	1,000 char.		.039

IE Carbon Copy	Each	IBM-00002454	.36
IE Dial out Characters	1,000 char.		.185
IE Trading Partner Summary Report	Each		\$25.00

## 6.2 EXPEDITE

Expedite, Expedite Base, and Expedite Notification Manager are licensed software programs that provide user interfaces and communications to Information Exchange. The programs utilize the many communication features of Information Exchange, such as international reach, distribution support, alias tables, archive capability, audit capability, selective message receive, and a flexible message-retention period.

Expedite Base does not have a Graphic User Interface. The Expedite Base products are designed to be called from a program, and do not provide an end user interface.

### 6.2.1 Expedite Software Fees

Item Description	Unit	BEID	Rate
Expedite Base/MVS	per month	IBM-00000889	\$178.00
Expedite Base forWindows	per copy		No Charge
